I. GENERAL PROVISIONS

The Planning Fee Schedule contains those charges assessed at the time an application is filed with the City, or which may be assessed during the processing of an application. The fee schedule sets forth those applications for which a deposit is required and those for which a flat fee is imposed. Deposits are required for those applications for which it is difficult to estimate actual processing costs. For these projects, the applicant is required to pay all costs incurred by the City in processing the applications, and may result in either additional charges or a refund to the applicant. Filing fees are required for routine applications in which processing costs have been estimated. The filing fee is assumed to cover all processing costs, and no adjustments will be made except in those cases where extraordinary circumstances exist.

Set forth below is a general index of the deposits and fees included in this fee schedule.

II. PLANNING FEES - DEPOSIT REQUIRED

A. GENERAL REQUIREMENTS

1. All persons filing an application for an entitlement set forth in this section shall pay the full cost of processing the application. An initial deposit shall be paid concurrently with filing of the application in the amount specified.
2. If the amount of the costs incurred in processing the application exceed the amount of the deposit, the applicant shall deposit additional funds if requested by the City to ensure continued processing of the application or the applicant shall pay the difference prior to the City filing the Notice of Determination.
3. If the amount of the costs incurred is less than the amount of the deposit, the difference shall be refunded to the applicant subsequent to final City action on the project.
4. Where a single project requires the filing of multiple applications with corresponding deposits and/or fees, all such deposits and fees shall be cumulative and costs shall be charged to the overall project and fee deposit, not to individual applications.
5. Where a single project requires the filing of multiple applications, some of which are subject to deposit of fees and others to filing fees, the applicant shall be responsible for payment of the full cost of processing the applications for the project.
6. In those cases where this fee schedule requires only the payment of filing fees, but the Planning Director determines that the subject application will incur processing costs significantly in excess of the amount of the filing fees, due to controversy or complexity, deposit of fees and processing costs pursuant to this schedule may be required. In such cases, the Planning Director shall notify the applicant in writing of the following:
 - a. That deposit of fees shall be required, with the applicant responsible for full costs of processing.

- b. The amount of the deposit.
 - c. The basis for requiring deposit of fees.
7. Some projects are the subject of broad community interest, resulting in an unusual number of public hearings prior to final action. For these projects, the applicant will not be responsible for City costs resulting from the additional hearings needed to provide opportunity for community participation and input. Application of this provision to provide relief to the applicant shall be subject to the following limitations:
- a. An unusual number of hearings which is defined as:
 - (1) Three hearings, with a minimum of 12 hours total allocated to consideration of the specific application, when only the Council or a single commission or board will hear and take final action; or
 - (2) Five hearings, with a minimum of 20 hours total allocated to consideration of the specific application, when considered by a combination of the Council and other commissions and/or boards.
 - b. In determining the number of hearings at which an application was considered, preliminary work shops and hearings on draft environmental documents shall not be included.
 - c. A project which involves multiple approvals occurring at different times or before different City agencies must satisfy the unusual number of hearings criteria for each application process. For example, a project involving both a rezoning and subdivision could result in a total of five hearings on the rezone (before Council and Planning Commission) and three additional hearings on the subdivision (before the Commission) without realizing relief from additional costs.
 - d. This provision for relief shall not apply where the project applicant requests consideration at an additional hearing(s).
 - e. This provision for relief will apply in those cases where an appeal of the action of a board or commission is filed by a party other than the project applicant and/or proponent.
